### Description

*Passport to College Reading* is a new online learning tool designed to support and reinforce key reading skills covered in McGraw-Hill's best-selling reading textbooks. Working at their own pace or as a class, students begin by taking a comprehensive diagnostic pre-test, which yields a personalized itinerary of skills to learn and review. Students then collect passport "stamps" as they complete activities and quizzes and gain proficiency in these areas. Instructors can keep tabs on what students accomplish by means of an easy-to-use gradebook.

### Table of Contents
